Board Notes

www.dominionclub.org

Clubhouse—On April 23, Heiberger Paving resurfaced the parking lot and re-striped parking spaces the next day. The handicapped parking spaces were moved to be closer to the entrance.

The fence around the pool was painted the week before the pool opened.

Pool—The clubhouse pool is open. As a seasonal reminder, the pool is open to all resident members in good standing and their guests between 8:00 A.M. and 10:00 P.M. daily. Residents are responsible for the behavior of their guests. A homeowner must accompany all guests.

All guests under the age of 14 years (children) must be accompanied by a resident and may only swim in the pool between the hours of 10:00 A.M. to 1:00 P.M. and 4:00 P.M. to 6:00 P.M. Only devices relating to aquatic safety are permitted during these time periods. Pets are prohibited anywhere within the pool area.

We don't have trash removal for the clubhouse or pool area. Please help us all by taking any trash with you after you use the pool.

Mailbox Maintenance, New Program—The New Albany Links Homeowner's Association (NALHOA), of which we are all members, will take over the maintenance of mailboxes throughout the Links beginning sometime in late June. The NALHOA will notify homeowners about the details of the project soon.

Essentially, the NALHOA board has hired a contractor that will replace/refurbish all Links mailboxes in late June and then provide on-going maintenance, like painting, for routine wear-and-tear. Any replacement due to damage or accident would be at the homeowner's expense.

All mailboxes will be semi-gloss black. Please don't paint your mailbox "Dominion Club green" because it will be repainted black later this month.

The DCHA board is exploring alternatives for painting lamp-posts black. Details will be forthcoming.

Golf Outing

4th Annual Dominion Club Golf Scramble is scheduled for Tuesday, September 18 at 8:00 AM.

Sign-ups will begin June 18th.

You may register as an individual (NOT AS A TEAM). The selection committee will make-up the teams based on handicap to insure a balanced and competitive event.

You may invite friends to play, but they might not be placed on your team by the selection committee. This process has worked out well in the past.

Last year we had 35 players and hope to have 40+ this year.

More information will be forthcoming.

Community Notes	5

Spring Cleanup

On Saturday, May 12., twenty of our neighbors got together for spring clean-up day. Many thanks to those that participated!

Memorial Day "Pot Luck"

About thirty of our neighbors got together for an impromptu Memorial Day "pot luck" at the clubhouse. Everyone brought a covered dish to share and a good time was had by all!

—Thanks to John Rhoads for photos

Craft Group

March's project was creating a set of acrylic coasters.

May's wreath project included making wool felt flowers.

The craft group is off for the summer and will meet again in the fall.

Micronutrient Deficiencies in Trees

A couple homeowners have expressed concerns about trees in our neighborhood, specifically micronutrient deficiencies in some maples. While there does not appear to be a widespread problem, it seems prudent to understand more about it.

Micronutrients are mineral elements that are essential for growth of plants, but they are only needed in very small quantities. Micronutrients include iron, manganese, zinc, copper, boron, silicon, and molybdenum. Deficiencies occur throughout the Midwest

A common micronutrient deficiency is manganese deficiency of maples. It is marked by pale green or yellow leaves, with veins that remain green. As the deficiency continues, new growth is stunted, branches may die back, and the margins and interveinal areas of leaves may become brown. In severe cases, the entire tree may decline over several years and die.

Several strategies can be used to improve the health and vigor of the tree, although none are easy or permanent. Effectiveness of these strategies is variable, and tree professionals disagree about their value.

The decision to treat established trees for micronutrient deficiency symptoms depends on the value of the tree in the landscape. Treatments may be costly, and may have unsatisfying results. Replacing the tree with a different type may be the most cost-effective solution.

Community Notes...

Stitchery—The DC stitchery group will meet June 11, and 25; July 9 and 23, at 7 pm in the clubhouse. Join us!

Mah-Jongg—Meets in the clubhouse every Tuesday between 1:00—4:30 pm, new players welcome! For more information contact Deb Butler at 614-933-0923 or dbutler3@insight.rr.com

A Friendly Reminder—Warmer weather and enjoying a walk with your furry family member brings a reminder to pick up and properly dispose of animal waste left along the way. Open windows and front doors, while enjoyable for dogs and cats, can result in animals barking or crying at outside activity/walkers. Please be kind to your neighbors!
